785.877.3323 or 800.577.3323

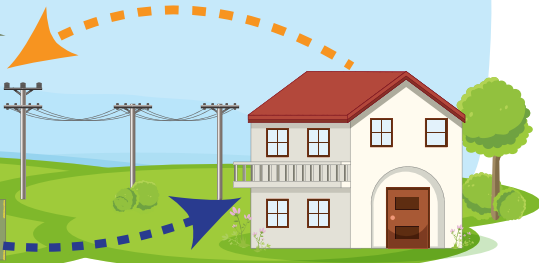

1. Prairie Land's power supplier, Sunflower Electric Power Corporation, generates solar energy at its Johnson Corner Solar facility in Stanton County, Kansas.

2. Residential members can choose to subscribe to Prairie Land's Community Solar Program at a cost of \$5/share per month. 1 share = 125 kWh or 2 solar panels

Shares are limited to no more than the average of your previous 12-month electric use. If your 12-month average = 1,000 kWh, then a max of 8 shares is allowed.

3. On your electric bill, every month you will receive a solar adjustment for your solar shares, which is based on the revenues derived from the power sold into the energy market.
